Resume Summary

Development analyst with 6 years of industry experience in designing, developing, testing, deploying, and maintaining packaged and customized software applications for a Fortune 500 company looking to leverage technical skills as a web developer. Have developed 3 websites from scratch using front end development tools, designed 1 active business website, and implemented customized user interfaces and features for packaged applications.

Skills

Front-end development

- Built a personal portfolio website using React.js and BootStrap
- Created an e-commerce store using Next.js, React, Redux, MongoDB, and PayPal
- Built a restaurant landing page using HTML, CSS, and JavaScript

Testing and debugging

- Debugged code using Chrome Developer Tools and Visual Studio Code Editor
- Tested and deployed code using Git and Netlify

Work Experience

DEVELOPMENT ANALYST

ONEOK, Inc., Tulsa, OK / June 2021-Present

- Consulted with users on the priorities, complexities, and other impacts of the project requirements
- Coordinated and communicated development activities with teammates, infrastructure personnel, vendors, and management when deploying solutions
- Migrated 51 departments from Jordan Lawrence to FileNet by corresponding with the Record Information Management team to collect data, set up new areas and security, and bulk import the records via KwikNav
- Piloted and implemented a two-phase record disposition feature in FileNet by serving as the liaison between the vendor and business user to develop, design, test and deploy disposition in 1 year
- Facilitated 2 hour quality assurance testing with stakeholders. Increasing the stakeholders' confidence in the system by 70%
- Enhanced the Real Estate Services' contract process 50% by automating the contract generation and routing process via DocuSign's Contract Lifecycle Management tool
- Partnered with teammates to migrate 70% of the company from SharePoint on-premise to SharePoint Online using Content Matrix

DEVELOPER

ONEOK, Inc., Tulsa, OK / June 2017-June 2021

- Collaborated with teammates, vendors, and business users to design and develop new customized repositories in FileNet for 3,000+ users
- Optimized the Record Information Management team's capability to manage records by 97% by integrating a record request feature in FileNet which allowed users to request records. Reducing the lost of records by 80%
- Improved the user experience in FileNet by implementing External Data Services to allow users to access metadata from external databases, which cut down 95% of user input errors

- Spearheaded the completion of an ongoing project in the absence of the technical lead by volunteering to go to weekly meetings with users and taking on new technical tasks
- Reduced the Human Resource Talent Acquisition team's daily workload 25% by creating a quarterly import job that transferred new hire files from a shared file into FileNet
